

MANTICORE

Manticores are fierce killers that hunt far and wide for prey. They aren't particularly bright but can converse with intelligent prey. If a manticore sees an advantage to be gained by sparing a creature's life, it does so, asking for a tribute or sacrifice equal to the loss of food.

WERERAT

Wererats are cunning lycanthropes that operate much like a thieves' guild. Through its bite, a wererat can pass along the curse of lycanthropy—something it normally reserves for new gang recruits. A player character cursed with wererat lycanthropy becomes an NPC under the DM's control on nights of the full moon.

WERERAT LYCANTHROPY

Any humanoid creature cursed with wererat lycanthropy retains its statistics except as follows:

- The creature gains the wererat's speed in rat form, as well as the wererat's damage immunities, traits, and actions that don't involve equipment. It can't speak while in rat form.
- The creature gains a Dexterity of 15 if its score isn't already higher.
- The creature is proficient with the wererat's bite attack. Attack and damage rolls for its bite are based on the creature's Strength or Dexterity, whichever is higher. The save DC for the creature's bite is 8 + the creature's proficiency bonus + the creature's Constitution modifier.
